

Obsessively, Relentlessly

**At Your
Service**

IOWA AND **ILLINOIS** **2023** **FOR YOUR HOME** ENERGY EFFICIENCY PROGRAMS

The energy efficiency plan provides all customers with a variety of programs and rebates for energy improvements. Participating in these programs is an important part of a long-term energy strategy for your home. These programs empower you to make decisions that help you save energy and money for years to come.

HOMECHECK® ONLINE

This tool provides an overview of your energy use and puts energy-saving ideas right at your fingertips. Visit MidAmericanEnergy.com/homecheck-online to learn more, or log in to your MidAmerican My Account to complete the assessment. Personalize your online home energy assessment by updating your profile for a more customized experience.

APPLIANCE RECYCLING

Rebates are available to recycle your older, working refrigerator or freezer and save you both energy and money. MidAmerican residential electric customers can schedule a free pickup on us online at MidAmericanEnergy.com/ee or call 800-621-2757.

INSTANT DISCOUNTS

MidAmerican offers instant incentives for the purchase and installation of qualifying energy-efficient natural gas furnaces and central air conditioners. By working with an Instant Discounts provider, your discount is automatically deducted from the purchase price, so there's no paperwork for you to complete.

RESIDENTIAL EQUIPMENT REBATES

MidAmerican offers rebates to help you save on the purchase of new energy-efficient equipment for your home. You can save on heat pumps, ductless mini-splits and even ENERGY STAR® certified smart thermostats. When you're shopping for new equipment for your home, be sure to ask your installer about eligible rebates. Rebate amounts vary based on the size and type of equipment. Submit applications online at MidAmericanEnergy.com/ee.

SUMMERSAVERSM

SummerSaver is a voluntary initiative for MidAmerican residential electric customers who want to help reduce energy use at peak times. You can participate using either a qualified smart thermostat or a traditional cycling device that attaches to the air conditioner unit. Customers who participate are eligible for an incentive each year they are enrolled.
