

SummerSaver Program Reminder

On June 1, our 2023 SummerSaverSM season will begin for participating residential customers in Iowa and Illinois. When a SummerSaver event is called, you and participating customers will receive an email alert and a notice will be posted [on our website](#). If a customer has a smart thermostat installed, they will be notified via email from the manufacturer.

Events may occur from June 1 through September 30, on weekdays between 2 p.m. and 7 p.m. During a SummerSaver event, customers participating with a load control receiver (LCR) device will experience their air conditioner cycle on and off in predetermined intervals. The indoor blower fan will continue to keep cooled air circulating throughout the home.

Sometimes customers will call local HVAC companies questioning if their air conditioning system is working or not, so it's important to note when we have an active event and that only customers participating in this voluntary program will experience any adjustments to their thermostat or air conditioner settings.

For questions or issues with the SummerSaver LCR device, call 800-437-2976. You also may refer to the [SummerSaver Program Information for HVAC Dealers and Service Technicians sheet](#) for more information.

For other questions on SummerSaver or our other energy efficiency programs, please call 877-290-4517 or [visit our website](#).

At your service, 24/7
