

IMPORTANT INFORMATION FOR TRADE ALLIES

SummerSaver Program Activation

Today, Thursday, June 10, 2021, a SummerSaver event will begin at 3 p.m. and will run through 7 p.m. for participating Iowa and Illinois residential customers. This is the first cycling day of the 2021 SummerSaver season.

Prior to going out on a service call during this time period, please ask the customer if they are participating in MidAmerican Energy's SummerSaver program. If so this may be why their home feels warmer than usual. Air conditioner compressors on customers' air conditioners or air-source heat pumps will cycle on and off during the SummerSaver cycling time period.

For more detailed information on the program and how the cycling devices work, please [click here](#).
